SWITCHEE TRUSTED INSTALLER NETWORK

Switch^{ee} Installations. Simplified.

INTRODUCING THE TRUSTED INSTALLER NETWORK

At Switchchee we understand that managing installation projects of any size requires time and resources, which are often in scarce supply. Maintaining the momentum of a key project can be a juggling act of multiple parts, suppliers and stakeholders. That's why we have developed the Switchchee Trusted Installer Network; to take that burden and make the process as smooth, simple, and efficient as we can for you.

The Switchchee Trusted Installer Network will:

- Manage the process of installation from beginning to end
- All our installers are trained to the highest standard
- Find and select the right installer for you and your project
- Ensure full project delivery and installation completion to the highest standards

**100% UK coverage
of installers
(Mainland and NI)**
